

## Grand X Guard USB 2.0 4 Port DVR

• • • •

Grand X-Guard USB 2.0 PC-based surveillance system allows you to connect up to 4 video signals and display or record on your PC and remote view through TCP/IP using Microsoft Internet Explorer. The system supports Windows 2000 and Windows XP. The system includes motion detection technology and utilizes the DivX MPEG4 Codec for optimal digital recording.

### System Requirements

- Intel Pentium 4, 1.0 Ghz minimum *Not 100% compatible with Celeron or non-Intel-based processors.*
- USB 2.0 Port
- Microsoft Windows 2000/XP *Not compatible with Windows Server Editions.*
- Audio output: sound card (for alarm)
- Internet Access w/ Static IP address (for Remote Viewing)
- Hard disk space: Plenty of disk storage for recording. At least 80 GB or above

### Features

- Display and record each camera or any video signal simultaneously.
- Adjustable video source (brightness, contrast and etc.), quality, alarm, motion detection area.
- Motion Detection: watch for movement detected and record the video clips
- Preview size adjustable.
- Allow the users to define the environment that they do not wish to observe, by adjusting mask area and sensitivity.
- Video file database management, delete, backup or review.
- Storage Recycle: When running out of disk space, you can delete the data of earliest date.
- Remote view through TCP/IP using Microsoft Internet Explorer (Static IP Recommended)
- Records in NTSC: 320x240 resolution
